This is the third edition of the TRADOC Union List of Periodicals produced by the TRADOC Library and Information Network. It is compiled from titles submitted by the TRALINET libraries. An explanation of holding statements is briefly outlined for the user below. While the editors made adjustments to standardize titles, there may still be some inconsistencies; we hope to clarify them in future printings. If you would like to make comments and suggestions to improve the union list, please contact Ed Burgess at the TRALINET center, AV 680-4491, comm. (804) 727-4291.

The TRALINET Center produced this union list on a Zenith microcomputer, using ENABLE, a database management and word processing program. We either typed in or transferred the records from diskettes into PCFILE using a built-in file import feature of the software. In order to produce the 3rd edition, most of the changes, additions and deletions had been made to the PCFILE database before it was transferred to the ENABLE database manager. The editors then reviewed the database for consistency in the titles and union notes.

Our input standards included these guidelines:
TITLES: The goal is successive entry. This means that there should be a separate entry for each title change, throughout the life of a periodical. A magazine published from 1938 to 1986, under four different titles, would therefore have four entries in the union list. Each entry would contain "continues" references to all past titles from the later titles. Past titles should have "continued by" references to the later titles. However, in most cases the holdings are entered as they were sent in by the contributing libraries. Titles with association names were entered as they are in Ulrich's. Local clarification added by holding libraries are generally omitted. City of publication may be used to discern among identical titles. Language may be included where appropriate. ISSN's are included when known.
RANGES: Consistent form of entry to aid in scanning the list for the closest library with the right date is the goal. Some examples:

v. 128, 1976+ (for holdings with volumes and no terminating date).
1976+ (for holdings with unknown volumes).
v. 128, 1976, v.130, 1978+ (for holdings with breaks in the run)
1976-1978. (for holdings that are closed)

These are the guidelines used for submitted entries:

1. Use upper and lower case letters for titles.
2. To show a current subscription, end the holdings statement with a plus sign, as: 1976+
3. To show a closed run, end the holdings statement with a period, as: 1976-78.
4. To show an incomplete run, use commas as needed, as: 1976-1978, 1981-1982, 1984+
5. This list does not show missing ISSUES; it does show missing years or volumes.
6. Use dashes rather than "to".
7. List the volume before the date.
8. For holdings defined as a current issues only, use the phrase "current _____ only" inserting "month, quarter, year, Sunday, etc." as appropriate.
9. List all range data (volume, current year, etc.) in lower case.
10. Multiple ranges from one library may be continued on separate lines.
11. If a run begins with a month or issue other than January, and the entry does not contain a volume number, show that month or issue.
12. Do not include other information, e.g., "indexed in" notes, special issues, frequency, etc.
13. List the libraries' OCLC symbols in alphabetical order.
